SUMMARY

Full-stack developer focused on building practical, AI-integrated web applications that solve real business problems. Experienced in developing end-to-end products with an emphasis on performance, and seamless user experience. I add value by turning ideas into reliable and continuously improving products through thoughtful engineering.

PROJECTS

Report Maker AI 🤖 | *React, Nextjs, Tailwind, Supabase* | [demo](#) 🔗 *Personal - Nov 2025*

- Constructed an AI-powered report generation platform that converts raw user input into clear, structured, and ready-to-use reports, reducing manual drafting effort by ~70%.
- Uses a secure, access-controlled database to ensure data privacy and reliability, currently supporting 30+ real-time users.

Email Finder AI 🤖 | *React, Nextjs, Tailwind, Supabase* | [demo](#) 🔗 *Personal - Nov 2025*

- An email discovery platform that uses intelligent analysis to help users quickly find accurate, relevant contact emails, reducing manual research time by ~65%.
- Applied vector embeddings to match and rank email sources effectively, improving result precision while safeguarding data through a secure, access-controlled database, currently supporting 50+ active users.

Doc Scanner SAAS 🤖 | *React, Nextjs, Tailwind, Inngest* | [demo](#) 🔗 *Personal - May 2025*

Developed a smart receipt management SaaS that interprets receipt data to automatically organize, classify, and summarize expenses, cutting manual bookkeeping work by ~80%. The platform applies AI-based analysis alongside a secure, permission-controlled data layer to safeguard financial information and currently serves 50+ concurrent users.

TECHNICAL SKILLS

Proficient in: HTML, CSS, JavaScript, React, Nextjs, Tailwind CSS, Python, Django, Fast API, PostgreSQL, LLM API integrations, Agentic AI

Tools & Deployment: Git, GitHub, Vercel, Clerk, Supabase

EDUCATION

Btech in Computer Science Engineering, 3rd year from Guru nanak Dev University Asr.

CGPA: 8.1/10 (Current)

Session 2023 - 2027
