SUMMARY

Full-stack engineer developing high-performance digital platforms, delivering scalable ecosystems featuring intuitive interfaces, resilient authentication, optimized infrastructure, intelligent automation, and enterprise-grade experiences transforming ambitious concepts into measurable business impact.

TECHNICAL SKILLS

- Frontend:** HTML5, CSS3, JavaScript, TypeScript, React, Next.js, Tailwind CSS.
- Backend:** Python, Django, FastAPI, Django REST Framework, SQL, PostgreSQL, Redis, Vector Databases, LLM API Integration, LangChain, LangGraph, RAG Pipelines, Prompt Engineering, AI Agents, Semantic Search, WebSockets, REST APIs, AWS, MCP, Multi-Agent Systems
- Tools & Deployment:** Git, GitHub, Vercel, Render, Supabase, Docker, Hostinger

EXPERIENCE

Full Stack Developer Intern | Obrive Industries Pvt. Ltd.

April 2026 - Present

- Architected and expanded an enterprise CRM featuring integrated real-time communication infrastructure supporting operational collaboration across 1,000+ workforce members.
- Supervised collaborative development for ObPark, an intelligent vehicle administration and parking ecosystem.
- Developed and launched the business platform for JEF Group, implementing SEO/AEO strategies, metadata enhancement, and performance refinement achieving first-position Google visibility.

Freelance Web Developer

Jan 2026 - Present

- Engineered and deployed multiple commerce platforms, onboarding 1,500+ visitors within initial launch phases while amplifying online visibility for diverse organizations.
- Increased client revenue by 20-30%, elevating monthly transaction volume from nearly 40 purchases toward 55+ recurring conversions.

PERSONAL PROJECTS

Doctor Assistant AI | React, FastAPI, PostgreSQL, Olama MCP | [demo](#)

Personal - Mar 2026

- Implemented adaptive tool retrieval mechanisms allowing language models to dynamically identify accessible utilities during runtime without predefined orchestration sequences.
- Enabled autonomous decision-making pipelines where intelligent agents coordinate chained actions including scheduling consultations, validating availability, and dispatching notifications.

Jobify | React, Next.js, Django, DRF, SQL, REST APIs | [demo](#)

Personal - Jan 2026

- Built a full-stack job portal that enables employers to post roles and candidates to search and apply through a secure, role-based system, streamlining the hiring workflow and reducing manual job management effort by ~60%.

DOC ANALYZER SAAS | React, Next.js, Tailwind, Inngest | [demo](#)

Personal - May 2025

- Architected a smart receipt management SaaS that extracts and categorizes expense data, reducing manual bookkeeping by ~80%
- Utilized AI-driven analysis to generate accurate summaries and improve financial tracking efficiency
- Built a scalable SAAS currently supporting 50+ concurrent users with stable performance.

EDUCATION

Btech in Computer Science Engineering, 4th Year Undergraduate from Guru Nanak Dev University Asr.

CGPA:8.1/10 (Current)

Session 2023 - 2027
